

# Luxury Retail Store Gets Its Finances Back on Track *for Future Business Growth*

DEVINE  
CONSULTING  
ACCOUNTING · SOFTWARE · SOLUTIONS

## RIDDLED WITH INACCURACIES?

Before working with Devine, a luxury retail store owner relied on Excel spreadsheets to track finances—a tedious and error-prone process that ate up a lot of his time. Total store revenue was not always accurate, and cash flow didn't reflect properly in the data. This made strategic business planning almost impossible.

## WE MAKE BOOKKEEPING A BREEZE FOR RETAILERS

Leveraging powerful accounting software and connecting it with the store's point-of-sale system, Devine Consulting seamlessly maintains accurate and up-to-date financials. Additionally, the technology integration allows for a more efficient bill payment process to keep revenue trackable without confusing spreadsheets. All the store's bank accounts and credit cards are now managed in one simple system, so the owner has full transparency into cash flow.

## MORE TIME FOR FUN

Today, this retail store benefits from precise, real-time financial data. The owner can access the information he needs to develop and adjust business growth strategies. Better yet, he has more time for the things he loves. Five months into our partnership, he gave us a call and told us his golf game has never been better!

## SUCCESS BEGINS WITH A HEALTHY FINANCIAL FOUNDATION

Devine Consulting is your choice resource for bookkeeping, accounting, and financial controller services. We provide one-on-one guidance on everything from software setup to tax strategy for a set monthly price, giving you the financial tools and knowledge to take your business to the next level.
